

## PATIENT MONITOR

### EMD211 Multi Parameter Patient Monitor

## 12" Screen

Multi-parameter patient monitor is a robust patient monitor, small enough to move around, yet flexible enough to adapt to your particular needs. With a variety of optional extras, including arrhythmia and ST analysis, EtCO<sub>2</sub> measurement and double IBP, multi-parameter patient monitor is configurable to suit your requirements. Purchase only the advanced features that you need and nothing more. With NIBP recall and extensive data storage capability, multiparameter patient monitor is particularly well-suited for use in peri-anesthesia and critical care environments. Rich in functions, conveniently adaptable and pleasingly affordable, multiparameter patient monitor may be just the monitor for your department
